Federal Communication Commission
Washington, D.C. 20554

DOCKET FILE COPY ORIGINAL

In the Matter of)

)
Amendment of Part 97 of the Commission's Rules) WT Docket No. RM-11305
To Implement WRC-03 Regulations Applicable to)
Requirements for Operator Licenses in the)
Amateur Radio Service.

Notice of Proposed Rule Making and Order-Comments

I am believe the FCC wants Amateur Radio to die!

I am AGAINST this Rule Making for the reason as it will diminish the hobby of technology that this country was built upon.

Just like good fences make good neighbors, definitive bands and modes allocations make good communications. This may be what the Commission wants for the future of Amateur Radio.

I object strenuously to Rule Making 11305 from both an Amateur licensee and a Commercial licensee. If passed it will be just like the "autobahn" in Europe, where speeds, modes and frequencies will incompatible. Therefore, phone modes will expand to occupy entire bands.

I request the Commission do an about face if one values our way of life.

Additionally, it will very difficult for the Commission to administer this ruling, if passed.

I thanks the Commission for your time.

Respectfully submitted,

Lee R. Wical, KH6BZF (20WPM+ Extra Class)
